

## TAMIL NADU

### **AAROGYA SETU'S INTERACTIVE SYSTEM -**

An Interactive Voice Response System (IVRS) version of the Aarogya Setu app was created by Tamil Nadu e-Governance Agency. Its questions and algorithm have been designed to analyse an individual's health condition on the basis of their responses in the IVRS system. The system is available in Tamil and can function without an internet connection.

### **USE OF TECHNOLOGY -**

Extensive use of technology in the state for overseeing contact tracing, quarantine and hospital infrastructure management; facilitating the movement of people and industrial workers (ePASS system) and managing containment zones and hotspots (GIS mapping).
