

JAMMU AND KASHMIR

CONTROL ROOM -

In the first week of March 2020, a 24×7 control room was operationalized in Srinagar to oversee contact tracing and containment efforts.

GIS MONITORING AND QUARANTINE MANAGEMENT -

Four technology applications are being used by the state administration for monitoring geofencing, door-to-door surveillance and quarantine management. By leveraging mobile-based applications, crowdsourced information, GPS tracking, bank account transaction details and other vigilance measures, control room officials in Srinagar were able to trace a large number of people who had previously not revealed their travel history.
