LEAVING NO ONE BEHIND: ACCELERATING PROGRESS ON SDGs

India has been driving an array of SDG initiatives in the past nine years. When the world collectively recognised the urgency of sustainable development and instituted the SDG framework, India was at the forefront to embrace, adopt, and champion it.

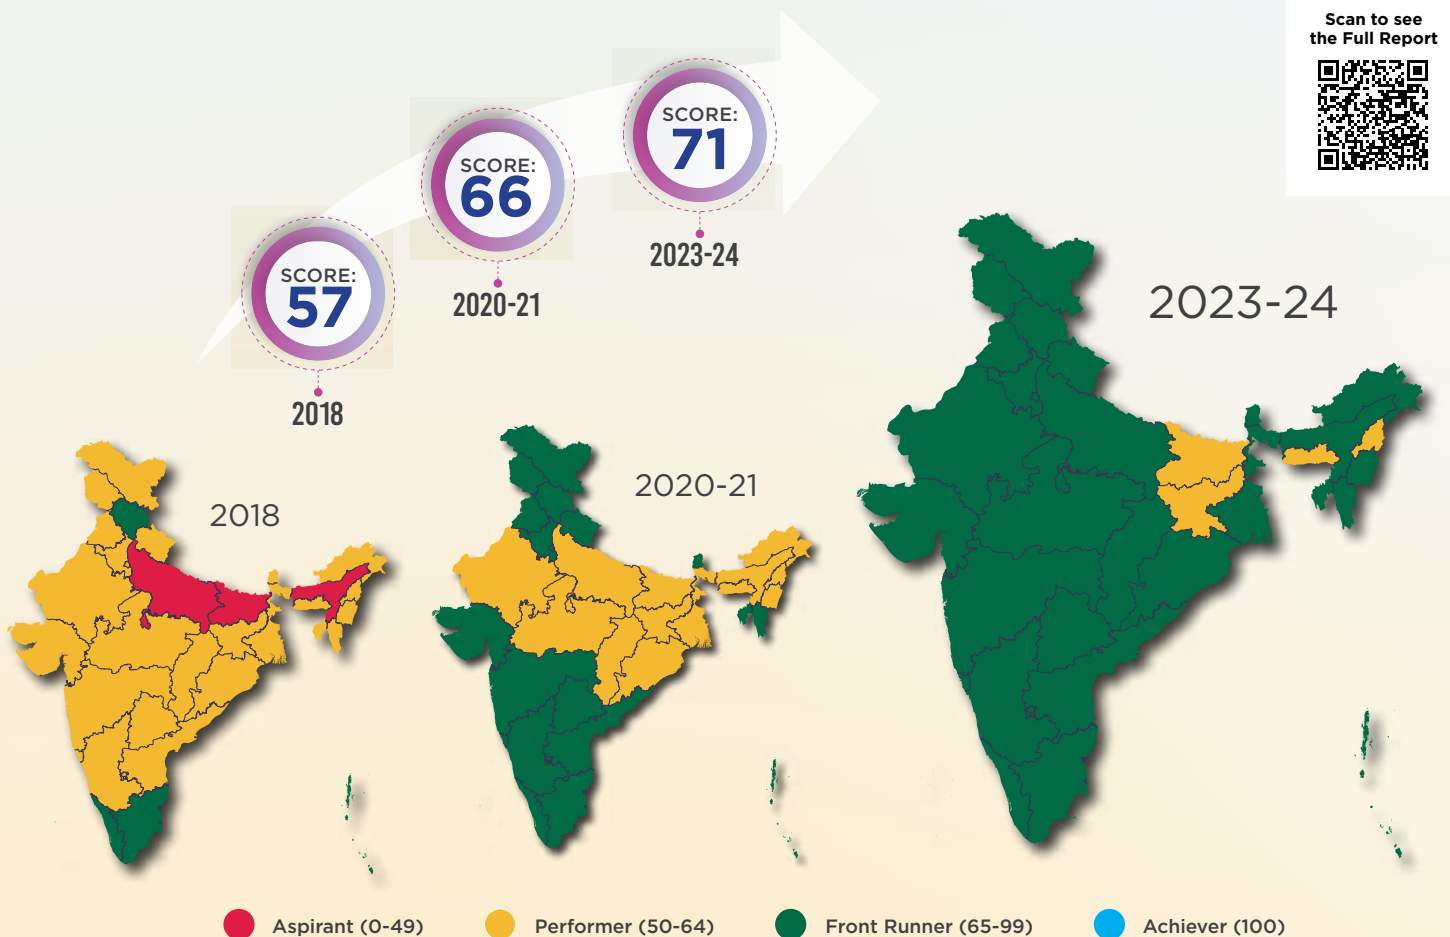

SDG India Index & Dashboard

India's flagship SDG monitoring tool has been the principal instrument for tracking the performance of its 36 States and Union Territories on their progress on the SDGs since 2018.

Popularly referred to as "India's Report Card on the SDGs", the SDG India Index 2023- 24 uses **113 indicators** to rank all States and Union Territories and place them into the category of Aspirant, Performer, Front Runner or Achiever based on their score.

India's performance on the SDG India Index between 2018 and 2023-24

Key Features of India's Localisation Model

**Collaborative
Competition**

**Building
Capacities**

**Robust
Monitoring**

**Whole-of-Society
Approach**

Scale of Transformation

119.2 million
toilets built for
improved sanitation

100 million
connections provided
for clean cooking fuel

40 million
urban and rural
houses constructed

248 million
escaped multidimensional
poverty between
2013-2014 & 2022-2023

Aspirational Districts and Blocks Programme: Reaching the last mile

112 | **500** | **5** | **40**
Districts | Blocks | Sectors | Indicators

Government of India has taken significant strides to reach the last mile in the form of Aspirational Districts and Blocks Programme. The programme embodies the principle of leaving no region behind by accelerating development outcomes in blocks and districts which were at the risk of being left behind. With States as the main drivers, this programme focuses on the strengths of each district and block and identify doable actions for immediate improvement, measure progress and rank districts and blocks. The concurrent monitoring of the progress of these districts and blocks through 'Champions of Change' dashboard is a key element of the success of this Local Area Development Programme. Central Ministries and State Governments continuously support and handhold district and block level actors to plan convergent action, undertake effective implementation, and provide requisite resources and capacity building to ensure that they register rapid development across selected SDGs.
